

CARTRIDGE: 9x19 Parabellum (9mm Luger)

ACTION: straight blowback operated

FEED SYSTEM: 8-rounds, Walther P1 magazines

WEIGHT (with fully loaded mag): 1530 g

SLIDE WEIGHT: 500 g

LENGHT: 180 mm

WIDTH: 27 mm

BARREL LENGHT: 90 mm

CONSTRUCTION DETAILS (only improvements towards the first version):

has no welding (slide milled and frame milled and riveted)

stable firing pin assisted with a spring

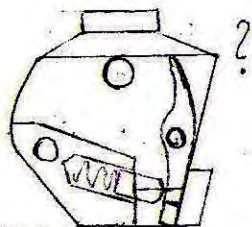

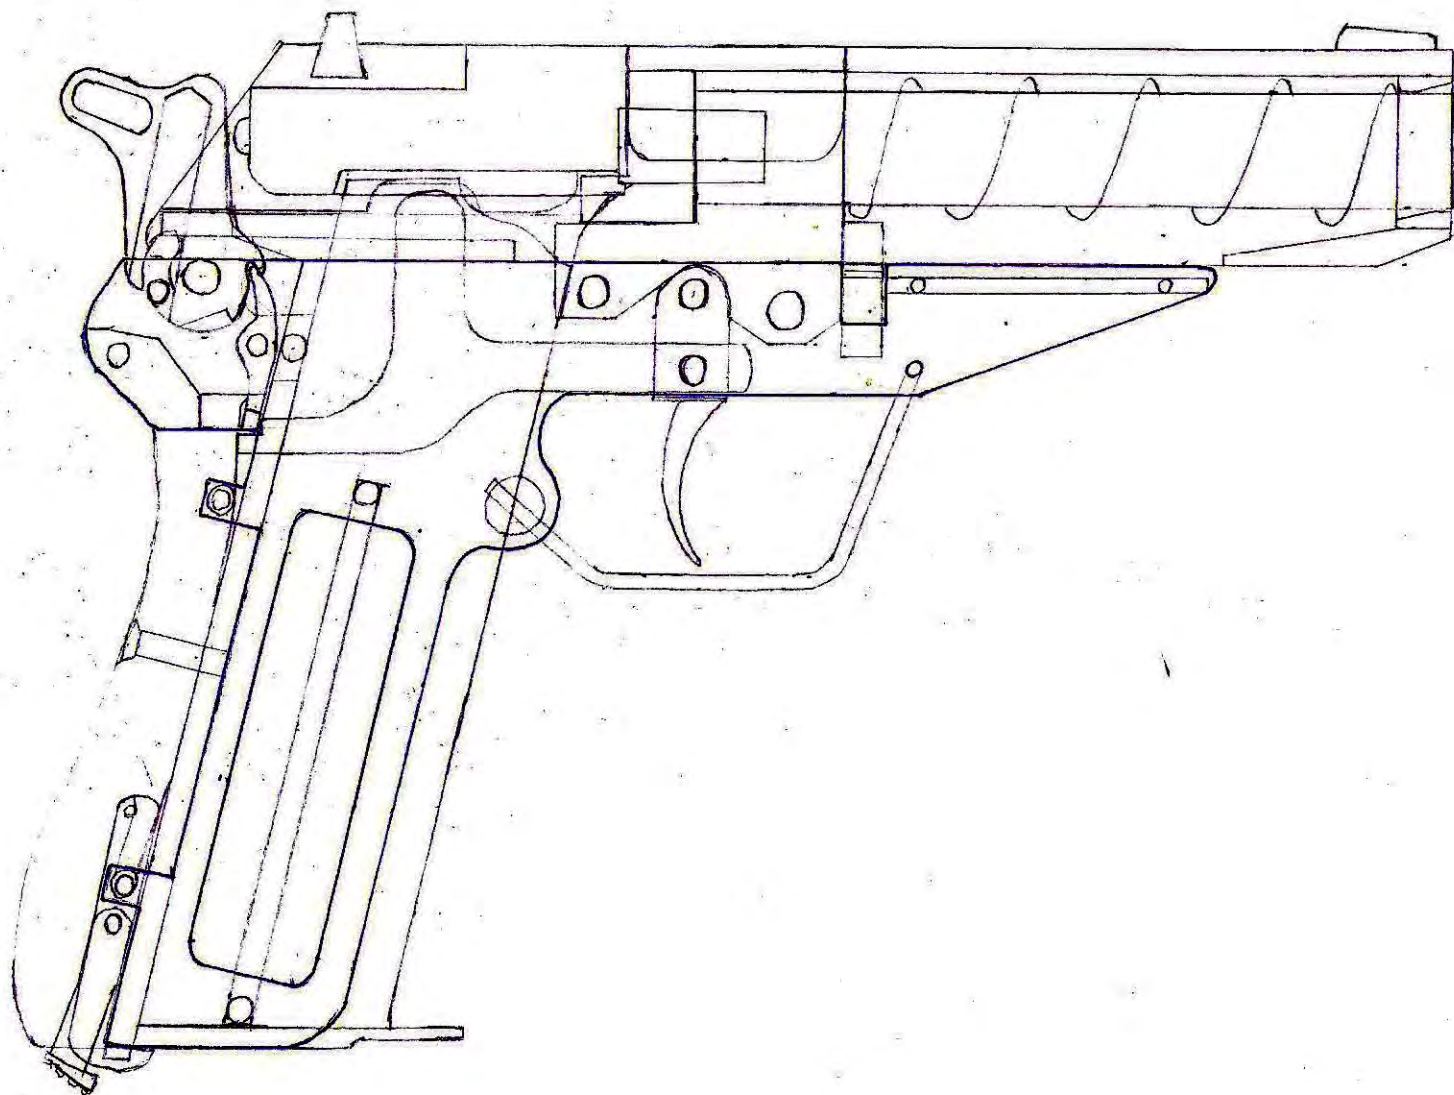

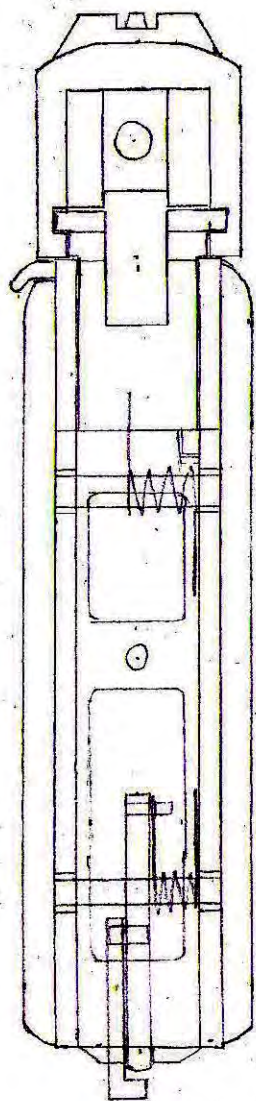

much better mag release

magwell is closed entirely (the two before has the magwell open from the front (it was made such a way becouse the lack of skill while making the first model )

external shapes and 'holes' are more neatly finished (the gun is ... let's say... more 'streamlined' )

a bit lighter than the first one

none of those pistol has ever jammed - they cycle with no problems at all (even with ammo reloaded with an improvised amateur technique)
